E-Risk360

Your Enterprise Risk Management Specialist.

Health, Safety, Environmental & Quality (HSEQ) Risks.

HSEQ Risk Assessments
HSEQ Auditing
HSEQ Training & Consulting

E-Risk360 leverages a risk-based approach to assess possible threats to your organisation and come up with mitigation strategies to manage business risks efficiently and effectively.

E-Risk60 is a fully Australian founded company offering tailored advisory and training services in Governance, Risk Management & Compliance (GRC). We believe that the principles of GRC are key enablers for business growth, innovation, continuous improvement and environmental stewardship. We focus strongly on Social Impact as a driving force that flows through everything we do, incorporating a strong commitment to supporting the 17 United Nations Sustainable Development Goals*. We strive towards developing partnerships with companies that also embrace this vision.

Our core services involve the provision of advice, developing of integrated management systems and conducting specialist training across the following areas:

- Understanding legal and compliance obligations relating to HSEQ risks

- Internal audits and gap assessments against relevant standards (i.e. ISO management systems), assisting organisations towards achieving external certification

- Risk assessments and developing risk controls & mitigation strategies

- Developing and implementing integrated management systems around Occupational Health & Safety, Environmental & Quality objectives

- Business Continuity & Recovery Planning

E-Risk360 has worked with small, medium and large private sector organisations, as well as across the Victoria, New South Wales State and Australian National levels of Government. Our extensive experience spans multiple industries, having handled projects for the transport, education, government services, clean technology, information technology, software development, engineering as well as testing, inspection and certification (TIC) industries.

Our Core Services

Auditing

Internal and external audits against the following standards:

- AS/NZS ISO 9001: 2015 – Quality Management.
- AS/NZS ISO 14001: 2015 – Environmental Management.
- ISO 45000 – Occupational Health and Safety Management.
- ISO 27001: 2013 – Information Security Management.

Consulting

Our decades of experience across risk management has taught us that no two businesses are alike. That is why our client-centric approach often begins with understanding your needs as well as identifying your specific business challenges in order for us to come up with practical, cost-effective tailored solutions. This process also often involves us evaluating your unique strengths and market position, allowing us to create key insights for your business.

Training

Our training programme has been fine-tuned to allow Executives and Managers to better understand the strategic nature of enterprise risk management as well as for the technical expert requiring up-to-date knowledge of compliance standards to equip them with the tools necessary for the implementation of comprehensive risk programmes. Our material is based on well-researched, practical and industry-specific case studies.

Participants of our Programme will Learn how to:

- Apply risk management standards and frameworks (i.e. ISO 31000).
- Define risks.
- Undertake risk assessments.
- Assess and evaluate risks using best practice methodologies.
- Audit, develop and maintain Integrated Management Systems (IMS).
- Manage business risks and maintain industry compliance standards.
- Continually improve their management systems.
- Achieve ISO certification.

Key Capabilities One Can Expect from Participating in our Programme:

- Development, maintenance, management and integration of Management Systems including:
  - » Environmental Management Systems (ISO 14001: 2015),
  - » Quality Management Systems (ISO 9001: 2015) and
  - » Safety Management Systems (ISO 45001: 2018).
- Application of Risk Management frameworks, principles and guidelines as in relation to ISO 31000: 2018.
- Systematically prioritise and manage Quality, Environmental & Occupational Health and Safety risks in the workplace.
- Undertaking carbon accounting and carbon footprint assessment (e.g. ISO 14064 green house gas verification).
- Application of Corporate Social Responsibility initiatives in accordance with ISO 26000.
